

POST - HEATER KIT

NOTE!

We strongly recommend that the installation be done by a qualified expert. Check local regulations before installation.

The post-heating kit is suited to both R and L models. The R model is shown in the figures.

1. Disconnect the ventilation unit from the mains.
2. Open the upper door of the unit.
3. Remove the cover panel (A).
4. Remove the covers from the fastening holes.
5. Lower the heater into place (B).
6. Fasten the wing bolts (C).
7. Connect the connector (D).
8. Replace the cover panel and close the upper door.
9. Plug the unit back into the mains.
10. If preferred, the cell bypass can be selected as the defrosting method from the control panel (see the manual).
