

Airflow SC 125

Acoustic ‘through the wall’ air inlet unit.

The Airflow SC125, an acoustic air inlet unit which allows efficient background ventilation automatically and discreetly, without the need for occupant involvement.

The unit was conceived with every home in mind, therefore it is easily installed in walls with either interior or exterior insulation.

Ideally suited to inner city dwellings in busy areas, the Airflow SC125 helps to reduce the disturbance from neighbouring roads or railways etc.

Features

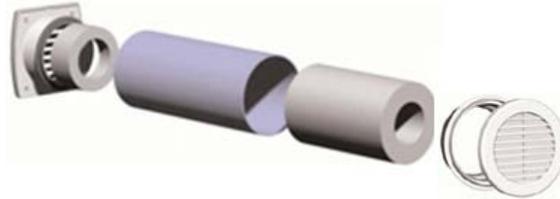

- Available in two models
- Model provides automatic regulation of air flow
- Suitable for fitting through both internally and externally insulated walls
- 3 year warranty

Model: SC 125 R 22
(22m³/hr)

Part No: 9041324
