Warning instructions

The adjacent symbols are safety-relevant warning symbols. All safety regulations and/or symbols must be absolutely adhered to, so that any risk of injury and dangerous situation is avoided!

Certificates - Guidelines

If the product is installed correctly and used to its intended purpose, it conforms to all applicable regulations and CE guidelines at its date of manufacture.

Intended use

The Insect Screen (part number: 90001003) is suitable for protecting against the penetration of insects (> 2 mm) in the window wall channel.

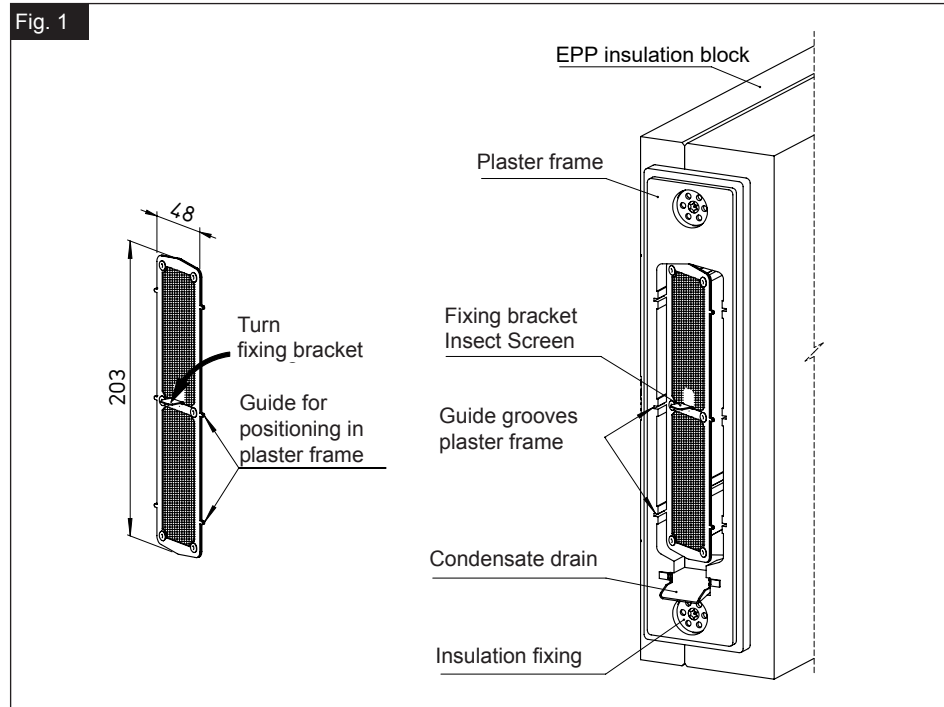

⚠ Any use other than the intended use is not permitted!

⚠ CAUTION

Installation/Assembly

Risk of injury from wall grille falling down.
Hold wall grille when loosening.

1. Loosen fixing screws in wall grille.
2. Remove wall grille soffit.
3. Turn fixing bracket for the insertion and removal of the Insect Screen, see Fig. 1.
4. Insert Insect Screen in the provided guide grooves of the plaster frame and slide it into the soffit duct until it reaches the stop.
5. Mount wall grille using fixing screws.
