

# MultiPlexBox installation in Student Halls

Kempton, Germany.

Figure 1: The site of the installation

## The Project Details

The MultiPlexBox was installed in a student residence in Germany with great success. You can find out more about this project here!

<b>Project</b>	Student Dormitory 9 Residential Units Memmingerstrabe 15 Kempton im Allgau
<b>Builder</b> <b>Architect</b> <b>Technical Building Services</b>	Alfons Hormann Gu und Planer Geier Schlusselfertigbau gmbH & Co. KG
<b>Builder Contract</b>	Burger Haustechnik
<b>Products used</b>	9 MultiPlexBox 1 Universal Controller DV1100 MVHR Unit

## The Residence Details

The single main MVHR unit is installed into the basement of the property. The MultiPlexBoxes will be responsible for regulating the airflow levels in the property. They are wall and ceiling mounted. The products were commissioning using the Modbus network functionality from a single laptop.
